Alex Arnaldo Segura Aleman

CRM Consultant & Functional Analyst | AI-Driven Solutions

Full-Stack Developer and QA Engineer with 10+ years of hands-on experience building scalable, client-facing web solutions. Specialized in React, .NET, PHP/WordPress, CRM configuration, and automated testing. Proven track record delivering projects end-to-end, from architecture and API integrations to deployment, with direct client collaboration.

EXPERIENCE

CRM Consultant · Full-Stack Developer · Functional Analyst

Feb 2023 – Jun 2026
El Salvador

Allied Global

- React/Redux and .NET development for custom internal applications.
- Full-stack feature implementation and API integrations.
- ClientSpace CRM configuration, workflow automation, and process design.
- MSSQL report automation, data extraction, and scheduled distribution.
- Technical support and client-facing consulting across cross-functional teams.
- Contributed to VocalBridge, an AI-powered communication platform, delivering frontend features and coordinating cross-functional integration across design, backend, and product teams.
- Served as Functional Analyst for CalibrAlte, an AI-driven QA monitoring platform; produced Business Requirements (DERCA/PBI), functional specs, UAT tracking, and sprint documentation.

Junior Web Developer & QA Tester

Jan 2021 – Jan 2023
Belgium (Remote)

Pointerpro

- Built and maintained features using Vue.js and React; DOM-level JavaScript.
- Created and optimized client landing pages with custom questionnaire logic.
- Executed QA test plans, regression testing, and bug reporting workflows.

Global QA Analyst & Reporter

Jan 2016 – Jan 2021
El Salvador

Telus International / Verint

- Administered and configured Verint, a QA and workforce management platform: set up client accounts, organizational hierarchies, Lines of Business (LOBs), BPO structures, and custom QA evaluation forms.
- Built Sisense dashboards and SSRS reports to track QA metrics, agent performance, and operational KPIs across global accounts.
- Designed and executed manual and automated QA test scripts; managed data validation pipelines and supported deployment verification.
- Led QA planning processes and coordinated cross-functional teams on quality assurance initiatives.

Scheduler & Data Reporter

Jan 2012 – Jan 2016
El Salvador

Telus International

- Managed workforce forecasting, scheduling, and service-level analysis.
- Produced operational reports and supported strategic planning initiatives.

PROJECTS & FREELANCE

Custom WordPress Sites

Designed and deployed custom WordPress sites for media, podcasting, and creative clients.

Client Consulting

Provided direct client consulting, technical training, and ongoing maintenance support.

PHP Plugins & Custom Solutions

Developed PHP plugins, custom post types, taxonomies, and advanced WP query logic.

AI & Automation Projects

Built workflow automations and AI-powered solutions to improve communication and QA processes.

Third-Party API Integrations

Integrated payment gateways, social media platforms, and analytics services via REST APIs.

Business Intelligence

Created dashboards and reports using SSRS, Sisense, and Excel to drive data-informed decisions.
